

Intramuscular Injection Programs at CCHAP

About Intramuscular Injection Programs

The Canadian College of Healthcare and Pharmaceutics is pleased to announce a three different program to upskill you in administration of intramuscular injection. The program is designed for health professionals and front-line workers to understand the concepts of intramuscular injection and to safely administer them. The program is delivered by a certified professional. The curriculum of the program meets the Health Canada competencies.

Here is a quick overview of the three programs.
